

First Announcement & Call for Papers

Objective

Managing Smart and Resilient Society

New world issues raised up in the UN General meeting in New York 2015 and COP21 convention in Paris, and push the world to look for more sustainable development goals, seek for disaster risk reduction measures, creating more robust and resilient social system to counter with ongoing climate change issues and coming aging society. The research on how to integrate planning and administrative process (both vertical and horizontal) with the aids of smart technology will be needed so that we can develop and manage the society system with the participation of stakeholders in the timely manner by using both indigenous and modern knowledge and know-how.

The operation of government administrations often possesses certain inertia and conflicts. In addition, theory development must undergo the process of organizational changes, alternations and amendments to laws, and practical applications. This is why we must work hard towards the direction of strengthening the participations from industry, government, and academia while seeking out through practical applications, verification and lessons learned for continuous improvement process.

In this situation, appropriate and innovative solutions have to be found to survive in the current and future economic and environment crises. Sound management of social systems has to be undertaken along with appropriate structural or technical solutions, smart technology and balancing uses of natural resources. With this background in mind, we call concerned planners, engineers, social scientists and practitioners to share ideas, knowledge, and experience for creating wider benefits for our societies in this joint conference. The ultimate goal of this conference is to create better understanding and synergy between proponents of regional and city planning and management of smart and resilient social systems to improve living standards.

Topics

1. Management of Disaster

- Mega Disasters and Challenges
- Disaster Early Warning, Preparedness, Prevention and Response & Recovery
- Pre and/or Post-Disaster Reconstruction and Rehabilitation Planning and Management
- Mainstreaming Disaster Risk Reduction into Planning
- Disaster Risk Financing
- Business Continuity Planning

2. IoT and Smart City

- Sustainable Regions and Cities
- Green City and Carbon Reduction for Resilient City
- ICT/IoT for Smart City and Region
- Social Based Method for Resilient City
- Urban Sprawl Management
- Energy Conscious City
- Transportation Management

3. Environment and security of Water, Energy, Food, and movement of NEXUS

- Asset Management, Information Management and Water Resource Management
- GIS and Remote Sensing
- Climate Change and Environmental Management
- Deforestation and Land Degradation
- Resiliency and Poverty

4. Infrastructure Planning and Management, Asset Management

- Infrastructure Management and Materials
- Construction Management and Dispute Resolution
- Urban Farming
- Rural-Urban Transformation and Land Conversion

5. Sustainability and Quality of Happiness

- Indicators of Happiness
- Resource Efficiency to Sufficiency for People

- Beyond Cost Benefit Analysis
- Thinking the Future Generation

6. Entrepreneurship and Regional Revitalization, Starting up Promotion

- Entrepreneurship and New Business Creation
- Regional Revitalization
- Tourism Planning
- Renewable Energy Business
- Utilizing Regional Resources
- IoT Business

7. Aging Society Planning, Operation and Management

- Innovative Enhancement Capacity
- Adaptive Forms and Behaviors
- Policy and Budgeting for Resilient City
- CSR/CSV and NGO's Contributions and International Cooperation
- Social Systems Management

Place

Bangkok, Thailand

Venue

Mandarin Hotel Managed by Centre Point
Address: 662 Rama IV Road Bangrak, Bangkok 10500, Thailand
URL: <http://www.mandarin-bkk.com/>
